## Skills

|               |                                                                                            |
|---------------|--------------------------------------------------------------------------------------------|
| Languages:    | C++, Python, JavaScript, TypeScript, SQL, HTML5, CSS3, C                                   |
| Frontend:     | React, Next.js, Tailwind CSS, Vite, Figma, UI/UX Design, CSS Animations, Responsive Design |
| LLMs & NLP:   | OpenAI, HuggingFace, LangChain, Semantic Embeddings, RAG Pipelines                         |
| Backend/APIs: | Node.js, Express.js, RESTful APIs, WebSockets                                              |
| Databases:    | MongoDB, PostgreSQL, MySQL                                                                 |
| Core CS:      | Data Structures & Algorithms (DSA), OOP, DBMS, OS, Computer Networks, Agile, Git           |
| Soft Skills:  | Problem-Solving, Team Player, Adaptability, Analytical Thinking                            |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                         |          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|----------|
| LocalDrop   Next.js, TypeScript, WebRTC Data Channels, WebSockets, Tailwind CSS                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <a href="#">[Live Demo]</a> <a href="#">[GitHub]</a>    | Aug 2026 |
| <ul style="list-style-type: none"><li>Engineered a serverless peer-to-peer file transfer engine leveraging WebRTC data channels and WebSocket signaling with zero server storage overhead.</li><li>Designed chunked binary streaming protocols and automated local subnet discovery, delivering 3x higher throughput compared to multi-hop cloud uploads.</li><li>Constructed a responsive Next.js web application with real-time transfer progress tracking, connection health indicators, and automatic reconnection logic.</li></ul> |                                                         |          |
| BLW-EAMS   React, Vite, Node.js, Express, MongoDB, Tailwind CSS, JWT                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <a href="#">[Live Demo]</a> <a href="#">[GitHub]</a>    | Jun 2026 |
| <ul style="list-style-type: none"><li>Architected an enterprise asset management platform featuring Role-Based Access Control (RBAC), JWT authentication, and Helmet security across 100% of routes.</li><li>Formulated work order tracking and asset lifecycle workflows with QR code tagging and analytical dashboards, decreasing maintenance downtime by 35%.</li><li>Implemented rate-limiting, sanitized queries, and structured REST APIs, maintaining database transaction consistency with sub-120ms response times.</li></ul> |                                                         |          |
| Chinh   JavaScript, Chrome Extension (Manifest V3), HTML5 File System API                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <a href="#">[Chrome Store]</a> <a href="#">[GitHub]</a> | May 2026 |
| <ul style="list-style-type: none"><li>Published an approved Chrome Web Store extension injecting in-context annotation overlays across ChatGPT, Claude, Gemini, and Perplexity for active users.</li><li>Deployed a local-first vault storage architecture using HTML5 File System Access API, writing atomic JSON backups directly to local disk for 100% data ownership.</li></ul>                                                                                                                                                    |                                                         |          |

## Training

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                         |
